International Journal of Theoretical Physics

Volume 21, Number 1 January 1982

Contents

Quantum Theory of Spin-3/2 Field in Einstein Spaces, *Amitabha Sen* 1

The Wave Logic of Consciousness: A Hypothesis, *Yuri F. Orlov* 37

Extended Space-Time and the Interpretation of Wave Functions, *A. I. Macfarlane* 55

Nonlinear Approach to Electrodynamics, *R. Righi and G. Venturi* 63

International Journal of Theoretical Physics

Volume 21, Number 2 February 1982

Contents

Variance and Covariance in Quantum Mechanics and the Spreading of Position Probability, *J. E. G. Farina* 83

Cylindrically Symmetric Zel'dovich Fluid Distributions in General Theory of Relativity, *G. Mohanty, R. N. Tiwari, and J. R. Rao* 105

Lorentz Transformation on the Lattice, *R. I. Arshansky* 121

Quantum Theoretical Physics is Statistical and Relativistic. II *Charles Harding* 149

Second-Order Tangent Structures, *C. T. J. Dodson and M. S. Radivoiovici* 151

International Journal of Theoretical Physics

Volume 21, Numbers 3/4 April 1982

Contents

Part I. Physics of Computation

Papers presented at the conference on Physics of Computation held on May 6–8, 1981 at MIT's conference center at Endicott House, Dedham, Massachusetts

Physics and Computation, *Tommaso Toffoli* 165

Quantum Mechanical Hamiltonian Models of Discrete Processes That Erase Their Own Histories: Application to Turing Machines, *Paul A. Benioff* 177

Minimum Energy Requirements of Information Transfer and Computing, *Hans J. Bremermann* 203

Conservative Logic, *Edward Fredkin and Tommaso Toffoli* 219

New Computer Architectures and Their Relationship to Physics or Why Computer Science is No Good, *W. Daniel Hillis* 255

Communication in Computation, *Robert W. Keyes* 263

Fluctuations and Dissipation in an Elementary One-Bit Information Storage System, *Madhu S. Gupta* 275

Uncertainty Principle and Minimal Energy Dissipation in the Computer, *Rolf Landauer* 283

Physical Limitations of Rate, Depth, and Minimum Energy in Information Processing, *L. B. Levitin* 299

Classical and Quantum Limitations on Energy Consumption In Computation, *K. K. Likharev* 311

Physics of Selective Systems: Computation and Biology, *Jerome Rothstein* 327

International Journal of Theoretical Physics

Volume 21, Number 5 May 1982

Contents

Finite-Dimensional Quantum Mechanics of a Particle. II, *R. Jagannathan and T. S. Santhanam* 351

Calculation of Oscillator Strengths for P III, S IV, Cl V, and Ar VI, *P. S. Ganas* 363

Energy Fluctuations of Thermodynamic Systems: Higher Moments, *H. A. Buchdahl* 369

Mass-Energy in Static Gravitational Fields, *Cheng-Deng Kuo* 383

Equation of Geodesic Deviation and Killing Tensors, *G. Caviglia, C. Zordan, and F. Salmistraro* 391

Polygonal-Path Approximations on the Path Spaces of Quantum-Mechanical Systems, *P. Exner and G. I. Kolerov* 397

Linearized Solution of Isentropic Motions of a Perfect Fluid in General Relativity, *Indira Addy and Bidyut Kumar Datta* 419

International Journal of Theoretical Physics

Volume 21, Numbers 6/7 June 1982

Contents

Part II. Computational Models of Physics

Papers presented at the conference on Physics of Computation held on May 6–8, 1981 at MIT's conference center at Endicott House, Dedham, Massachusetts

Symbolic Dynamics of One-Dimensional Maps: Entropies, Finite Precision, and Noise, *J. P. Crutchfield and N. H. Packard* 433

Simulating Physics with Computers, *Richard P. Feynman* 467

Quantum Sets and Clifford Algebras, *David Finkelstein* 489

Deterministic Computer Physics, *Donald Greenspan* 505

An Informal Partial Overview of Information Mechanics, *Frederick W. Kantor* 525

Cellular Vacuum, *Marvin Minsky* 537

Noncomputability in Models of Physical Phenomena, *Marian Boykan Pour-El and Ian Richards* 553

The Computer and the Universe, *John Archibald Wheeler* 557

Discrete Event Models for Cell Space Simulation, *Bernard P. Zeigler* 573

The Computing Universe, *Konrad Zuse* 589

International Journal of Theoretical Physics

Volume 21, Numbers 8/9 August 1982

Contents

Part I. The Dirac Symposium

Papers presented at the Dirac Symposium, Loyola University, New Orleans, May 1981

Dedication to P. A. M. Dirac, *A. R. Marlow* 601

Pretty Mathematics, *P. A. M. Dirac* 603

Large Numbers Hypothesis. I. Classical Formalism, *Peter J. Adams* 607

Variable *G* and the Strong Equivalence Principle, *V. M. Canuto* 633

Large Number Hypothesis and The Matter-Dominated Universe, *Itzhak Goldman* 665

Meaning of a Varying Gravitational Constant, *S. -H. Hsieh* 673

Gauge Invariance and the Dirac Equation, *Donald H. Kobe* 685

Scalar and Neutrino Fields in the Gödel Universe, *D. A. Leahy* 703

International Journal of Theoretical Physics

Volume 21, Numbers 10/11 October 1982

Contents

Part II. The Dirac Symposium

Papers presented at the Dirac Symposium, Loyola University, New Orleans, May 1981

Dedication to P. A. M. Dirac, *A. R. Marlow* 755

Semiclassical Expanding Discrete Space-Times, *Wesley K. Cobb and Larry Smalley* 757

Electrodynamics: A Consequence of Nonlinear Realizations of the Lorentz Group, *Bill Dalton* 765

Generalizations of Gravitational Theory Based on Group Covariance, *Leopold Halpern* 791

Quantum Mechanics and Geometric Analysis on Manifolds, *Robert Hermann* 803

Wave Equation of Symmetry Constrained Dirac Particles, *Jaime Keller* 829

Relativity from Quantum Theory, *A. R. Marlow* 837

Covariant Chronogeometry and Extreme Distances. III. Macro–Micro Relations, *I. E. Segal* 851

Relativity and Quantum Mechanics, *Hüseyin Yilmaz* 871

International Journal of Theoretical Physics

Volume 21, Number 12 December 1982

Contents

Part III. Physical Models of Computation

Papers presented at the conference on Physics of Computation held on May 6–8, 1981 at MIT's conference center at Endicott House, Dedham, Massachusetts

The Thermodynamics of Computation—a Review, *Charles H. Bennett* 905

Gödel's Theorem and Information, *G. J. Chaitin* 941

Magnetic-Bubble Conservative Logic, *Hsu Chang* 955

Causal Nets or What is a Deterministic Computation?, *Péter Gács and Leonid A. Levin* 961

Symbolic Space Determinations on Physical Limitations, *Panos A. Ligomenides* 973

State-Transition Structures in Physics and in Computation, *C. A. Petri* 979

Modular Implementation of Concurrency, *Lutz Priese* 993

Some Remarks about the "Efficiency" of Polyautomata, *R. Vollmar* 1007

Author Index for Volume 21 1017
